

Enrich[™] Response to Intervention

The **Enrich[™] RtI** web-based solution reduces your paperwork load and allows educators to deliver informed instruction, accurately track interventions, and monitor student progress. **Enrich** integrates with your SIS system and uses data from any publisher's assessment, probe, or intervention to generate a complete, accurate, and timely view of a student's performance and response to various interventions.

Data-driven decisions are at the heart of improving student performance. Without easily accessible data, identifying students in need of help and monitoring their progress can be a monumental and time consuming process. **Enrich** makes your student data accessible and gives you the tools to efficiently and effectively improve student performance.

Administrators and educators using **Enrich RtI** can significantly reduce the time spent sifting through data from different systems and gain greater insight into student performance patterns.

"Excent has been a valuable partner to the SC Special Education program for more than 15 years. We're excited to implement Excent's newest solution, Enrich[™], that combines Special Education Case Management, State Reporting, and Response to Intervention management. Enrich will be a huge benefit to educators as they provide differentiated instruction to all students."

Marlene Metts
State Director of Exceptional Children
South Carolina, Department of Education

Administrator Benefits

- Monitor district, school, classroom, and student performance more easily with comprehensive access to data
- Support teachers more effectively with district prescribed instructional knowledge and standards
- Improve student outcomes more efficiently with proven interventions and streamlined progress tracking
- Facilitates implementation of a Multi-Tiered System of Support (MTSS) for all students
- Everyone in the district has the opportunity to impact student success

Educator Benefits

- Quickly find appropriate interventions
- Efficiently develop reasonable goals
- Utilize a logical progress monitoring process
- Follow Instructions to implement the prescribed strategy
- Use your districts preferred instructional supports, interventions and strategies

The Next Step

Contact **Excent** today at **800-231-3144** or email us at **info@excent.com**. We can guide you on the implementation process and how it integrates with your existing special education program.
